

LUCAS[®] 2 CHEST COMPRESSION SYSTEM

Myth Busted! LUCAS *does* fit large patients!

Weight: 180 lb
Height: 6 ft

Weight: 330 lb
Height: 6 ft, 5 in

Weight: 320 lb
Height: 5 ft, 10 in

LUCAS 2

CHEST COMPRESSION SYSTEM

Patients Eligible for Treatment:

- Sternum height of 6.7–11.9 inches (17 – 30.3 cm)
- Maximum chest width: 17.7 inches (45 cm)

The use of LUCAS is not restricted by patient weight.

Proper Placement is on Upper Chest

Do not assume the LUCAS Chest Compression System can't fit larger patients. Many large patients carry their weight through their mid-section. When LUCAS is properly applied, it rests over the upper chest or sternum, with enough room for the compressor to give compressions according to guidelines. As long as the unit snaps into the backboard and the suction cup does not compress the patient's chest in the start position, it will operate as intended.
